2/19/02
1. (Amended) A reclosable package having a top, bottom, and sides, said package comprising:
- a first wall and a second wall opposite to said first wall;
 - a first zipper profile having a first interlocking member and a first flange portion, said first flange portion being attached to said first wall along a line extending substantially from side to side of said package;
 - a second zipper profile having a second interlocking member engageable with said first interlocking member and a second flange portion, said second flange being attached to said second wall along a line extending substantially from side to side of said package; and
 - at least one of said walls and flange portions forming a wall segment beyond the attachment line of said wall to its associated flange portion, said segment extending over said profiles' interlocking members to a frangible connection with an opposite one of said walls to provide a tamper-evident feature for said reclosable package.
